Home (you are here)	What's wrong with the USA?	Plea to President Obama	Earned Income Tax Credit Loophole	Contact Me

Thank you for visiting my Eliminate Income Tax web site. This site was set up because I believe the federal income taxes are too complicated and too unfair.

We do need tax revenue, and I would like our legislators to replace the current Federal Income Tax with a National Sales Tax.

FYI, my lovely wife and I have been filing and paying federal income taxes on time for over 25 years (unlike some government officials). We're honest, hard-working people.

Here are some reasons why we should eliminate the federal income tax:

1. **Politicians have been talking talking for years about simplifying taxes. Our tax code is currently over 66,000 pages! Why is it so complicated? Eliminating the income tax will surely simplify our taxes!**
2. **We can actually shrink the size and role of government. We could eliminate much of the IRS, sell their buildings, computers, etc.**
3. **No more federal income tax forms to fill out. No more record keeping. We would save lots and lots of time, as well as a whole lot of paper and trees!**
4. **Let the states collect the new National Sales Tax. Most states already collect a sales tax. Adding a National Sales Tax would require very little overhead to initiate.**
5. **Drug dealers / criminals are dealing in cash and avoiding income taxes. With a National Sales Tax, they will be paying taxes on things like automobiles and on small-ticket items too!**
6. **A flat consumption tax is the fairest of all taxes. People would be taxed based on a fixed percentage of what they spend -- not what they earn.**
7. **This will provide people with an incentive to earn MORE money. The current system tax system is a progressive tax -- for the most part, people are taxed more when they earn more.**
8. **Our current tax system is flawed. There are loopholes, like the Earned Income Credit (EIC). Look at [my example](#) of how people can get a tax refund when they do not pay any taxes, whatsoever.**
9. **If we stop collecting and paying Federal Income Taxes, taxpayers will not only have more time and less stress, they will also have a lot more money to spend. This will be great for our economy.**
